

06 – Project Testing

LegalEase: AI-Powered Legal Document Generator

Team Leader: R. Vidhya kumaran

Team Members: R. Tharun, M. Suyambu lingam

Academic Project Documentation

1. Test Strategy

Testing covers functional validation, UI behavior, generation workflow, error handling, export consistency, security controls, and usability.

2. Test Cases

- TC-01: Submit with missing required fields → validation message displayed.
- TC-02: Select NDA → NDA-specific fields appear.
- TC-03: Change document type → irrelevant fields are hidden/reset safely.
- TC-04: Valid data → generation request succeeds.
- TC-05: AI/API failure → friendly retry message appears.
- TC-06: Generated draft → editable preview displays correctly.
- TC-07: Export PDF → file is created and readable.
- TC-08: Secret/API key exposure check → no secret appears in client source.
- TC-09: Empty/ambiguous user facts → placeholders or validation prevent invented details.
- TC-10: Disclaimer → visible before final export.

3. Expected Results

All critical test cases should pass before demonstration. Any AI-generated content should be checked manually for completeness, consistency, and unsupported claims.

4. Defect Handling

Record defect ID, severity, reproduction steps, expected result, actual result, fix, and retest status.
